Uncommonly little money is being wagered at all.

Not only is there an amaxing amount of popular apathy, notwithstanding the closeness of the race, but even the shrewdest political prognosticators confess themselves too much up in the air to justify gambling on the result. Wall Street estimates there might not be more than \$100,000 in stakes at this hour, if that much. There have been times in New York, a week before election day, when a million in wagers was placed. **PLANES HIT** IN AIR; TWO MEN KILLED

Officials admit that there will be a deficit during the current fiscal year of several hundred million doilars, but they hope to meet it without calling for increased taxation. They believe that it can be absorbed to a great extent. The Internal Revenue Bureau is making a drive for collection of back taxes and the settlement of pending claims. From this source it is anticipated that the returns will be larger than estimated previously. WASHINGTON, Oct. 30.-The

administration has no-intention of urging imposition of additional taxes upon the people at the comnig session of Congress.

This was made plain today by officials of the Treasury who have the confidence of the administration in revenue matters and who declare that any comprehensive revision of the revenue law would be deferred until the regular session of the next Congress beginning in December, 1923.

The direct statement was made by a high Treasury official that the present Congress would not be called upon to revise the existing revenus haw in any important particular. In fact, administration leaders hope to keep the administration recommendations regarding legislation down to a minimum in order that Congress may devote its whole attention to the enactiment of ship subsidy legislation before March 4, next.

Even if Secretary Mellon were inclined to propose any new taxes at the coming session it is a certainty that his recommendations would not get far with Congress. Secretary Mellon during the consideration of the revenue law a year ago, urged the imposition of additional taxes, including a Federal automobile license tax and a tax on gasoline. The Republican leaders in Congress refused to accept these proposals and insisted on reducing taxes far below the aggregate which Secretary Mellon thought necessary. This is entirely distinct from any amendments to the revenue law, being in the form of a resolution instead of a bill and requiring a two-thirds vote in Congress and two-thirds vote in Congress and ratification by the Legislaturea of three-fourths of the States,

Even if Congress adopts this resolution at the coming winter session it might require two or three years to obtain action by the States, which means that it will not help to solve immediate financial problems of the treasury.

President Harding is anxious that Congress shall clean up its work on March 4, so that no special session following that date shall be necessary. To do this congress will have its hands full with the ship subsidy bill and the military appropriation measures.

manent tariff act, were found as the duties applied to wool, wheat and sugar.

"The law seems to have assisted in relieving the acute depression in the wool growing industry," according to a statement, which adds that its effect there was largely in removing a strained credit situation and in causing millers to use domestic rather than imported stocks. Western bankers, the statement adds, felt better secured with wool paper when foreign wools were virtually embargoed.

"The duty of 35 cents a bushel on wheat," says the statement "seems to have affected only the trade in northern spring wheat produced in the upper Mississippi and Missouri valleys in competition with Canadian wheat of the same variety. Large quantities of other varieties of wheat are exported from this country, therefore an import duty has little effect upon their prices. There usually is a deficiency of the domestic hard spring wheat for blending.

SOFIA, OCT. 30.—The correspondent of the Public Ledger foreign service interviewed Dr. Fridjof Nansen on his journey from Constantinople via Adrianople and Rodosto to Athena. The League of Nations commissioner declared that though he had heard various rumors of massacres and atrocities in Thrace he was unable to confirm them nor had investigators sent by airplane been able to establish anything beyond a panic-stricken flight of the Greek population.

These were flocking by scores of thousands to the ports of Rodosto where ships to convey them to Greece await. Refugees including those from Asia Minor number at least 500,000 whom it is necessary to feed until their transportation to Greece can be arranged.

Dr. Nansen obtained up to the present 1000 tons of flour from Bulgaria and 500 from Egypt but this amount is pitiably inadequate.

Dr. Nansen paid a tribute to Kemal Pasha, whom he described as a statesman as well as a soldier. He said he intended to take up with Kemal on his coming trip to Brusa the question of the return to Thrace of the Bulgarian refugees who were left in Thrace when it was surrendered to Turkey in 1913 and during the subsequent Greek occupation.

WOULD BARE FACTS

"We invite the commission to make a searching inquiry into the relation of wages to the cost of production of coal and the prices which the consumer is required to him," the letter stated. The Unit-ed Mine Workers of America is just as anxious as the commission or the public to have all the facts with regard to wages brought out, along with every other fact relating to the coal industry.

"We want to know and we want the public to know sust what it costs to produce a ton of coal and the price which the consumer pays for the same ton of coal, and find out who gets the money represented by the same ton of coal, and find out who gets the money represented by the same ton of coal, and find out who gets the money represented by the same ton of coal, and find out who gets the money represented by the same ton of coal, and find out who gets the money represented the production of 13,500,000 tons being produced at the coal needed could be produced if the miners were steadily employed.

Concerning the waste of coal in mining process, it was estimated that fully \$500,000,000 annually is added to the nation's coal bill in that manner. Some governmental authority could be exercised to prevent waste, it was said.

Figures designed to show inadequate transportation facilities for coal were cited, and the letter stated "a much greater supply of coal carr" was needed and urged the commission to ascertain the facts and make recommendations to remedy the situation.

Regarding a coal storage system to provide a steady flow of coal and to prevent a shortage, the letter said: "We believe the commission could undertake no other line of inquiry that holds greater possimayor part de la población civil on mayor part de la población civil on more described and complete of for a scultur of the facts of the civil of the facts of the civil of the facts of the civil of the civil

"THE LAST WORD IN STORM DRAIN CONSTTRUCTION."

Where Every Dime is a Youthful Dollar;

If You Wait Until Improvements Are Completed, You'll Pay the Price!

THAT is the Big Idea we are trying to get across to every person in Southern California. Can't you plainly see that once the beautiful concrete streets are in, sidewalks, curbs, storm and sewer systems finished, that homeswill rise one after another—that within three years Belmont Shore Place will be dotted with hundreds of homes?

We want to talk to men and women who can picture Belmont Shore Place a few months from now. You are the kind of neighbors we want. But if you are inclined to listen to the knocking of those people who have never seen Belmont Shore Place, and who don't know one thing about what is going on, stay away!

We Can Offer You Extraordinary Terms: Buy Now-Build When You Can

There isn't a chance in the world for you to buy a lot in Belmont Shore Place a few months from now at the price you may pay today. That is why we urge you to buy now—then build later, if you cannot build at once. A million dollars' worth of improvements is not to be sneezed at, especially when they are going in all about you! Just look around Long Beach and see if you have 5-inch concrete streets, the finest storm drain system in the Southland, and a beautiful inland bay facing you.

Bank Clearings Increase Twenty-eight Per Cent; Note of Pessimism in Food Market

Seasonal growth in the volume of business in Los Angeles is picted in the estimated October bank clearings, showing an increase of per cent over the same period of last year and 9 per cent over September of this year. Clearings for the month of October amount to proximately \$470.674,951.25, with today estimated, as against \$430.

The increase of the public in the belief that one period of the public in the belief that one of the public in the belief that one of the public in the belief that of the pu tember of this year. Clearings for the month of October amount to approximately \$470.674,951.25, with today estimated, as against \$430,-141.598 for September and \$365,769,900 for October, 1921. The increase reflects the growing confidence of the public in the belief that prosperity is returning, and such confidence naturally appears in the volume of business passing through the banks. The recovery from the condition of depression and pessimism prevailing at the beginning of the year is strikingly indicated by an increase of approximately \$60,483,764 in October clearings over January, or 14 per cent. Every index points to a continuation of this cumulative growth and prophecles are frequent that the end of the year will find total bank clearings in Los Angeles far exceeding previous records.

Following are the comparative figures for 1921 and 1922: 1922. *********

the delicate condition of the market have undermined the credit of the growers. Shipping agencies have largely discontinued the practice of advancing money to them for seed and cultivation expense on which the grower has heretofore depended.

Tomato growers in California will more than likely fare well in the season just ending because of the fortuitous appearance of the car shortage. Faced with a crop that ranks second only to Indiana in size, growers in this State were in an awkward position at the beginning of the season. The acreage planted amounted to 24,137, against 6357 in 1921, and the estimated yield for the season at 173,-786 tons, compared with 37,028 for the previous year. With a sensityle market to compete in, prospects for a good year were not bright until the shortage of shipping equipment appeared; but now according to one marketing

pects for a good year were not bright until the shortage of shipping equipment appeared; but now, according to one marketing concern, tomato growers will probably receive a net return of \$1\$ a box, which is 10 cents less than the 1921 net figure.

The tomato crop in Southern California has been practically disposed of, but the remainder left on the vines has been injured during the last ten days by hot winds and the numerous fires raging in the mountains and foothilis. Early frosts have also set in, to the detriment of the fruit, and many growers have reported losses on the fruit not yet sent to the canneries, or transported to the canneries, or transported to the eastern centers of consumption.

California lettuce is beginning to move as the eastern crop ceases to be a factor because of frosts. Prices are high at this time, but will decline as the season prograsses. The acreage in this State is about normal, and the yield will be fair. Shipments will continue from the districts adjacent to Los Angeles until the latter part of December, when the activity will shift to the imperial Valley for the following four or five months.

Approximately 5000 acres have been planted to cauliflower in Southern California, and shipments are being made at this time of the early Snowball variety. Prices average about \$5\$ cents per pony crate, and will continue fair throughout the season, in the estimate of shippers.

Are Bonds a "Buy"?

ARE bonds a "good buy" today?

Or are prices so high and yields so low that investors would do well to wait a year or two for lower prices and higher yields?

Bond prices and bond yields move in cycles. In the century from 1820 to 1920 there were three complete cycles. The last cycle, from 1878 to 1920, closely follows the previous two, and, as the above chart shows, the new cycle, beginning in 1920, is almost identical, to date, with the last one.

Will history repeat itself? If it does (and it always has) the yield of bonds will drop one

full per cent before the cycle brings high yields around again. And, judging from the past, that point will not be reached for for many years.

We can gauge the future only from the history of the past. Viewed in that light, Bonds ARE a "good buy" today.

With only minor reverses, prices of bonds will rise and yields will fall, for a considerable time.

Before We Recommend a Security

WE STUDY the business in which an issuing company is engaged before we back its security with our recommendation.

In California there is no industry whose success is more certain than hydroelectricity.

California has no coal in commercial quantities. The oil supply is limited and in the end we must depend upon our only perpetual power —hydro-electricity.

The Western States Gas & Electric Company, a successful utility for 34 years, is now building hydro-electric generating stations on the south fork of the American River. Power will be carried to such population centers as Stockton, Eureka and Richmond where the da mand has compelled the company to buy power from other hydro-electric companies for distribution to a consumers.

EW YORK STOCK EXCHANGE NEW YORK CURB CLOSE

NEW YORK, Oct \$0.—Renewal of heavy bear attacks, which failed

ointa.
With the business and industrial situation showing continued im-provement, traders could account correction of a weakened technical condition, which was brought about by speculative excesses of the recent upward swing. With

brokers' loans estimated as high as \$1,800,000,000, it is believed in as \$1,500,000,000, it is believed in some quarters that banks may have forced some of the liquidation by calling loans. All records for the largest number of individual stocks dealt in on the New York Stock Exchange for a single day were broken today when the tape recorded the mis of 470 different issues in the five-hour session. The former record was 458 made fast April.

April.

Today's opening was irregular, a few stocks deriving strength from the initial 4½ point gain in Gulf States Steel, all of which was latter canceled, the stock closing at a small fractional losa. Shipping shares were the largest of the short interests, both Marine preferred, and American International Corporation being depressed to new low records for the year on speculative fears that the next semi-annual dividend of the former might be passed.

Tobacco stocks were then attacked on account of another cut of cigarettes, Liggett & Myera dropping 15 points; Lorillard Tobacco 1%. American Tobacco 4%. Tobacco Products A 1%, the preferred 2%, and Reynolds Tobacco 1%. On home of the few points being registered by the Pan-American issues, Pacific, Houston and Cosden oils; Phillips Petroleum being forced down 5% points with losses of 1 to nearly 4 points being registered by the Pan-American issues, Pacific, Houston and Cosden oils; Phillips Petroleum, Poyal Dutch and American Asphalt, Standard Oil of New Jersey, thich was registered at a loss of more than \$175,000,000 on the quoted value of its outstanding stock since its high of the year, 250%, was one of the few exceptions, scoring a net gain of 2 points at 193%.

Encouraged by the success attained in their raids against the industrial shares, "short" sollers turned their attention to rails, with supprising results. St. Paul common and preferred were the hardest hit, declining \$1\%, and \$5\%, points, respectively. Other substantial losses were recovered by Reading, off \$1\%, Anadam Pacific 1\%, Pere Marquette 2\%, Lehigh Valley 2 and New York Central 1\%, Selling of rails was influenced, no doubt by the poor showing made in the latest September earnings statement.

Speculative disappointment over the course of copper prices, which have fallen slightly below \% cent a pound, apparently was responsible for the heavy selling of coppers, despite the fact that they have been isaging far behind the rest of the list in recent upward swings. WALL STREET NEWS

NEW YORK, Oct. 30.—Wea been heraided far and wide, and it is understood that most buyers padded their subscriptions. It is probable that in some cases this padding was carried to a point where buyers secured more bonds than they exactly wanted, and the decline in the open market to a position below par represented reselling of the surplus bonds. At the same time, it is hard to accept this theory in full in view of the fact that many savings banks and other institutions restricted by law to investments of this character, were not able to secure their full requirements, which would indicate a large potential purchasing power in spite of the new bonds at par.

Anaconda led the copper list in a general downward movement. Although prospects for the copper stocks have been very bright for the past several months, this group as a whole has failed to follow the prevailing market trend, and in some quarters this is accepted as an indication of a weakened technical position.

Your \$1000 Can Be Rented To Bring \$65 a Year

ONEY can be rented, like a house and lot. There is, however, one important difference—it is more important and more difficult to make sure of the safety of a rented \$1000 than rented real estate. One must be satisfied with a reasonable return if one is to be safe.

The rate on good safe first mortgage real estate bonds is 61/%. One can get more, but it is not safe to compromise with safety.

At 64% your \$1000 may be rented to bring you \$65 a year. Investigate Straus Bonds, which give you the safe interest rate of 61/2%. They are in \$1000, \$500 and \$100 amounts, thus affording investments for sums of any size. Call or write today for literature describing these standard safe investments,

EDERAL COURT HEARS TALKS

INCREASED TAX COLLECTIONS

SAN FRANCISCO. Oct. 36.—Ar-iments were heard in the United of making permanent the ern Pacific Company against tion of increased taxes from I tak and a like amount of 1921 tax, now impounded with court, to the company, or the ning lover of these amounts to State in ful satisfaction of its ms dnuce the King bill. The ter was these under submission

S. Webb, State Attorney GenLe called attention to an order
he Sicramento County Superior
irt of June 20 directing the
spany to pay \$6,125,700 under
King bill, and said that the
y thing now remaining to be
e was for the company to meet
creder of the Etate Court in fullmoneys impounded by the
leral Court represent the differes between the payment under
old levy of 5 1-2 per cent of
gross receipts and the 7 per
t payment demanded by the
bill.

"We feel sure that the Federal Court will not overturn the action of the State Court." Webb argued. "I regard the present action of the railroad as immature. It should have swated the actual demand for the payments of the amount due until such demand is made. This action is out of place."

The company in its argument made a plia for the return of the impounded funds on the grounds that the law is unconstitutional.

BOLAND'S SISTER HERE FOR IRELAND

NEW YORK, Oct. 36.—Kathleen Boland, sister of the late Harry Boland one-time American
representative of the Irish republic, arrived today to collect money
for the Irish Republican soldiera
and dependents' relief fund.

Miss Boland's version of the
shooting of her brother by Free
State soldiera differed from the
secount cabled at the time of his
death in that she accused the
Free Staters as having shot him
while he slept. The generally accepted version was that he redisted arrest.

Miss Boland, who wore deep
mourning, said that she was engaged to marry Sean O'Donovan,
a prisoner in Mountjoy Prison,
Dublin, who had recently gone on
a twenty-one-day hunger strike.

The only evidence that his car carries a complete radio outit, he explained yesterday, is the receiving instrument which is necessary to listen in with, and which in this case is attached to the steering wheel, so as to make it handy for the motorist.

This mechanical arrangement, according to Mr. Hellman, has worked without a finw, and he believes it should prove a boon to motorists desiring to equip their cars with radio, minus outside overhead aerials. He is able, he says, while riding at ordinary speed, to hear radio programs as plainly as he does with the apparatus he has installed at his homa.

Damage in Old Olive-

Enceived down by a freight carbeing switched at Guasti Station, near Ontario, yesterday, Albert B. Boronda, aged 40, of Los Angelea, a special officer employed by the Southern Pacific, died of his injuries while being taken to the San Antenio Hospital at Ontario. An inquest will be held today at Ontario, in an effort to determine the circumstances of his death.

A moment before the officer was struck he had ejected a number of hebos from an eastbound train, which he had ridden from Ontario. Boronda was employed to guard freight care following the theft of a large quantity of merchandise from a box car recently between Ontario and Colton.

The greatest toilet soap in existence—Palmolive is one of its creations.

Now we have perfected a Shaving Cream which he excels all others. In fairness to yourself and us. lask you to try it—free.

To satisfy men

We asked 1,000 men what they most desired in a Shaving Cream. Then we spent 18 months to meet those desires as no one else had done.

We made up and tested 130 formulas before we stained the ideal.

But the result today is a Shaving Cream supreme these five respects.

Way 1—It multiplies itself in lather 250 times.

Way 3—It maintains its creamy fullness for ten minutes on the face.

May 4—The bubbles are strong, so they hold the hairs erect for cutting.

Way 5—The after effects are delightful. The blend of palm and olive oils leaves the skin in fine condition.

STRONG FRESH SQUAD

The first-named backfield will swarage about 177 pounda and the second not much over 189.

General student opinion is that Coach Hunt's team is about the strongest first-year aggregation that ever represented the Cardihais. The most cheerful thing about the eleven is that it is particularly strong in the backfield where the varsity is not toe powerful. Next year the present year-Thes will move up and present screagth right where strength will be needed.

While U.S.C. is generally admitted to have considerable of a freshmen eleven, the Etanford yearlings are hopeful of a victory in Los Angeles.

LEGION GETS SNAPPY

MATURAL MOVE

As it is natural to expect a vice-president to move a step ahead to the presidency, Dwight F. Davis is regarded in most circles as the degreal successor. Undoubtedly the donor of the famous Davis Cup would be the unanimous choice if he gave his consent, and he may do so. But Davis is connected with the Department of the Interior in Washington, and is kept presty busy, and it is a question whether he can spars the time to serve the National Tennis Association as he would like to. If he decides he can, the presidency is his if he cannot, the race is wide open, with George W. Wightman of Boston, Holcombe Ward and Watson M. Washburn of New Tork and Paul W. Gibbens and Samuel Culiom of Philadelphia among the leading candidates.
